

I must tell you that your car rocks. For a stock boost Vortech S-trim your car set the bar for all other 05-07 mustangs that have come to b&d with a 461 at the tire. It has held that mark and now it has raised the bar again. 479rwhp & 419rwtq☺ The best part is that she stayed together. Your part throttle drivability is sweet. Your car is that 1 out of 10 that just runs better than most. Your car is ready for you.
